

Entering the Albanian Alps by ferry through the reservoir of Koman this tour offers the chance to discover Valbona Valley and Theth, two of the most picturesque regions in the Albanian Alps, which are likely to become tourist 'favourites' in this beautiful but rugged area. The guided tour combines four days of trekking and 1½ days of traveling by minibus and ferry. Hiking through the mountains the participants enjoy the marvelous panorama of the Albanian alps and experience the beauty of their nature. Staying at guest houses and meeting local people brings them in touch with culture and gives opportunity to experience the well-known Albanian hospitality. Because of its climatic conditions and the remoteness of the region this tour has a unique recreational value. It is the philosophy of Samsel Travel to provide this recreational experience to its costumers.
